SUMMARY

Senior Software Engineer with 6 years building production web apps in React, Next.js and TypeScript. For 4+ years at NashTech I have worked on DuluxGroup's AU/NZ consumer and trade platforms, across the front end, GraphQL microservices, Firebase and CI/CD. I am the top contributor by commits to the Dulux consumer website (470+ merged pull requests) and a senior engineer on its 2026 Contentful → Optimizely CMS migration. Certified PSM I and AWS Cloud Practitioner, and growing toward SM/PM and technical lead roles.

EXPERIENCE

NashTech Vietnam — Senior Software Engineer

Aug 2022 – Present · Hanoi (hybrid) · Client: DuluxGroup (Australia & New Zealand)

Optimizely CMS Migration · Apr 2026 – Sep 2026 · Senior Software Engineer

Moved Dulux Consumer Web, Trade Web and Trade App (AU/NZ) from Contentful to Optimizely CMS before the September 2026 Contentful renewal, to cut licence cost and enable personalisation and experimentation.

- Moved the GraphQL Image subgraph to Optimizely Graph: client, typed code generation per environment, repositories, mocks and tests, Bynder images and hierarchical page links.
- Fixed Core Web Vitals and Content Security Policy issues on the consumer and trade sites; added Lighthouse audit scripts and an `llms.txt` route.
- Turned off the OneTrust consent popup in CMS preview mode, and fixed Bynder SVG and image-slider issues.
- Patched about 18 dependency vulnerabilities (CVEs) in the Firebase backend, including express, jws, qs, uuid and tar.

- Wrote detailed designs and task breakdowns, reviewed and refactored code, and mentored new and junior developers.

Tech: Next.js, React, Optimizely CMS, GraphQL, Elasticsearch, SAP Commerce, Bynder, Segment

GTM Consumer — Dulux Consumer Website · Aug 2022 – Mar 2026 · Software Engineer (Aug 2022 – Dec 2025), Senior Software Engineer (from Jan 2026)

New development and BAU for dulux.com.au and dulux.co.nz, where customers explore colours and products, read painting guides, and buy samples and paint.

- Top contributor by commits to the website, with 470+ merged pull requests.
- Built the new sign-up flow on Azure AD B2C and Firebase: API endpoints with API-key and host checks, secrets from Azure Key Vault, an hourly Cloud Function for data clean-up, and deploy pipelines with gitleaks scanning.
- Built an HMAC-signed BIM link that adds colour samples to the cart, plus a test-link generator for UAT.
- Delivered the product page redesign, Product Select Wizard, Colour Detail Page (carousel, zoom, Roomvo visualiser), Store Locator filters, and product filtering and sorting on Elasticsearch and GraphQL.
- Built HubSpot forms, mega menu hover timing, the case-study image gallery slider, and Most Loved Colours (swatches, add to cart).
- Improved SEO and speed: server-side rendering for listing pages, server-rendering and caching fixes (ISR store pages, App Router crashes, hydration errors), schema.org data and sitemap fixes.
- Fixed WCAG accessibility issues: heading order, form labels, ARIA roles and link names.
- Modernised the codebase: Tailwind v3, Next.js Image and Font, Enzyme to React Testing Library (56 files), and shared Anchor and Button components (109 files).
- Wrote Contentful migrations and data scripts and added fields to GraphQL Federation services.
- Clarified requirements and wrote acceptance criteria, estimated and broke down tasks, contributed to architecture, and reported risks and status.

Tech: Next.js, React, TypeScript, Tailwind CSS, Apollo GraphQL, Node.js, Elasticsearch, Contentful, Firebase, Azure, Netlify, Jest
